

MYCOHORT

CREATED BY: YASH, RONIT, & ARSHVIR

THE ISSUE

- Teachers and Students Need An Easier Way to Work Virtually
- This Involves :
 - Improve 1 on 1 Communication Between Students and Teachers
 - Keep Track of Deadlines
 - Easy To Understand

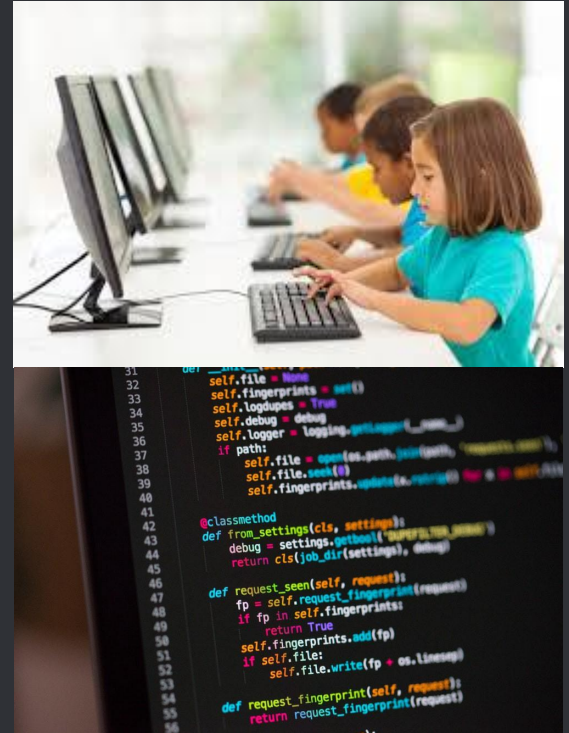

MYCOHORT

OUR SOLUTION

- MyCohort is a responsive hub, where all educational platforms are integrated into one large application
- With technology currently dominating the education industry, MyCohort was created not only to help inside the classroom, but outside as well, to users of all age groups
- Extremely user friendly UI and UX
- All events and important dates can be directly managed on the google calendar linked to the user's personal account integrated on the app
- Can be used to post grades and submit assignments
- Teachers and guidance counselors can easily communicate with students

SCALABILITY

- Currently schools have licenses with several different companies
- My Cohort is a major stride forward in technology and accessibility for students.
- Our application provides a combined service but replaces the need of schools having to license with several different companies
- Large opportunity as it is extremely reliable and the education industry will never crash
- As the application is recognized and grows, more features will be added to make My Cohort a bigger part of every student's life.
